

CORPORATE CAPABILITIES

WORK TO BE PROUD OF

Mobomo is a world-class developer of high-performance applications and websites which we carefully craft to fit the needs of government agencies. We work hand-in-hand with our clients to deliver mobile, web, and cloud solutions using advanced DevOps techniques, which we integrate with our proven Agile software development methodology. We have had the opportunity to create innovative and functional applications and websites for our federal clients that have won various awards and notable press mentions, including making the top ten list in the Apple App Store New and Noteworthy, winning the 2014 AFCEA Innovation Jam contest, and receiving the 2014 Webby Award.

SERVICES & CAPABILITIES

Mobomo is proud to be an [AWS Government](#) and [Acquia Partner](#), which allows us to provide outstanding staff to our clients, including: Certified Project Management Professionals, Certified Scrum Masters, AWS Certified Solution Architects, AWS Business Professionals, AWS Technical Professionals, and Drupal Contributors. We provide federal agencies with a disciplined Agile software development shop to create award-winning mobile, web, and cloud solutions.

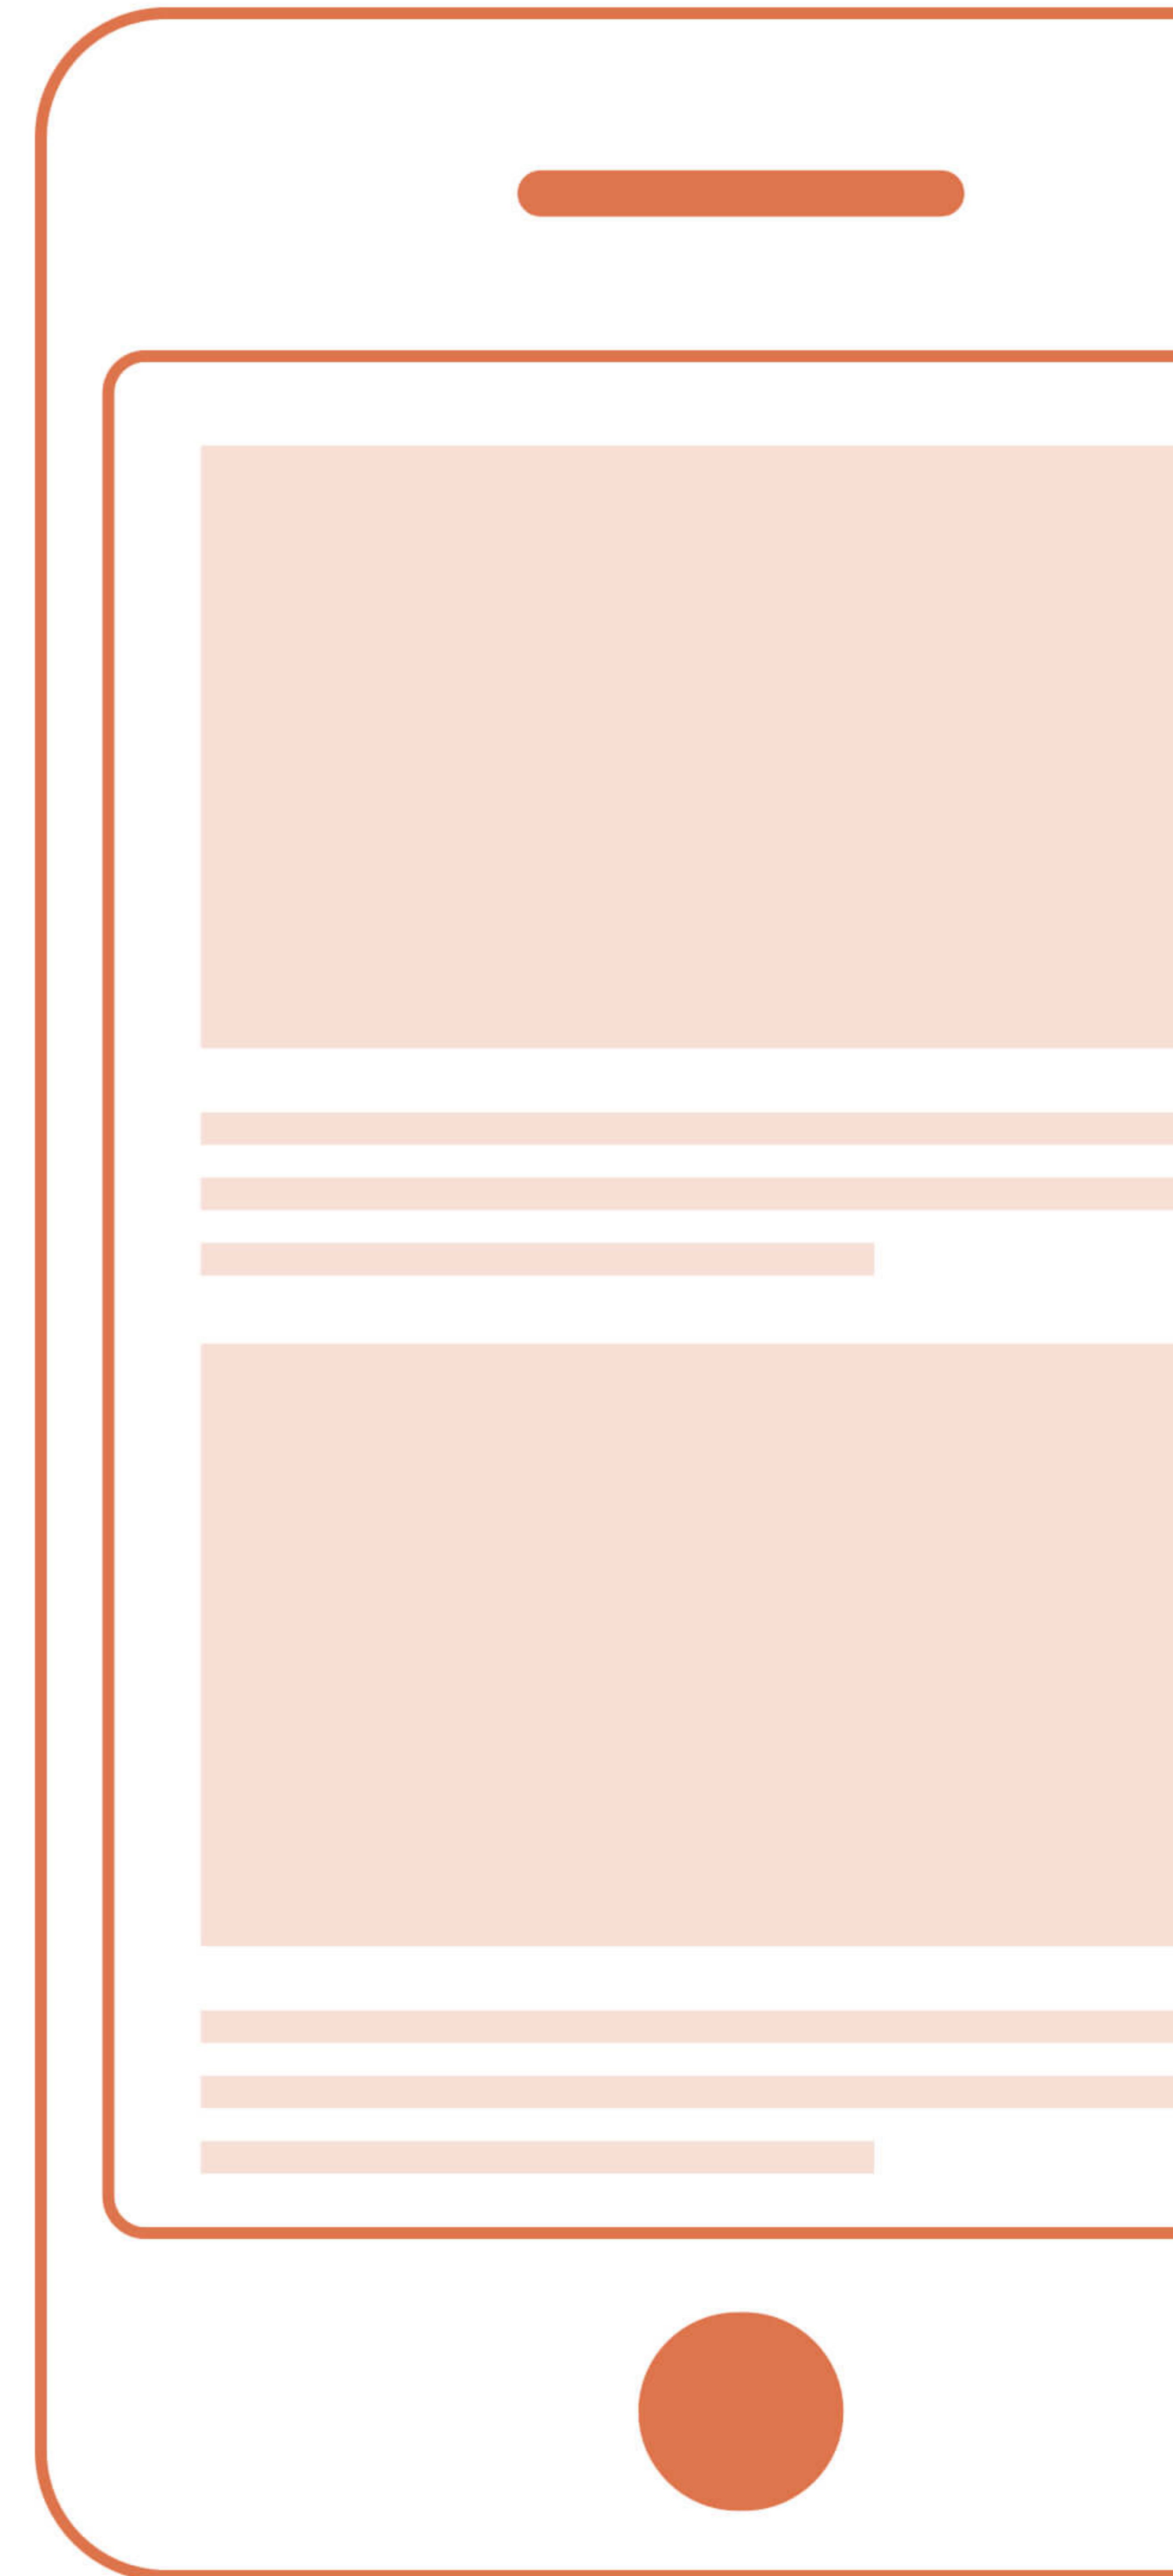

CMS

Mobomo has leveraged [Aegir](#) to provide Drupal-as-a-Service (DaaS) platforms for federal agencies. The DaaS platform provides high-availability, high-performance, and high-security while sharing infrastructure for multiple Drupal websites for major cost savings. Its management portal allows administrators to quickly launch new sites at the click of a button and easily manage all sites through a single interface.

MOBILE SOLUTIONS

Mobomo is a leading developer in mobile solutions. We have considerable expertise in building both native apps and responsive websites. We have successfully launched mobile solutions for federal agencies, including the National Institutes of Health, the U.S. Navy, the U.S. Department of Veterans Affairs, and the General Services Administration.

DESIGN & DEVELOPMENT

Mobomo's designers and engineers are behind some of the largest websites and applications in the federal government, including USA.gov and NASA.gov. We are experts in deploying large-scale open-source solutions, including Drupal, WordPress, and Ruby-on-Rails.

CLOUD COMPUTING

Mobomo's engineering team are cloud specialists. We have experience implementing large-scale solutions in the cloud for clients such as: NASA, USGS, Department of State, and Department of the Treasury. Our solutions are able to handle the highest amount of traffic the government experiences with increased security, performance, and availability; all while significantly reducing total cost of ownership.

WE KNOW GOVERNMENT

In addition to the work at NASA, Navy, and the White House, Mobomo has developed numerous mobile, cloud and web solutions for agencies including the National Institutes of Health, the U.S. Geological Survey, the General Services Administration, and many more. Thus, Mobomo not only has the development capabilities all organizations are seeking; but we also understand the unique requirements of the federal government. Such as Section 508 accessibility and certification and accreditation (C&A) requirements.

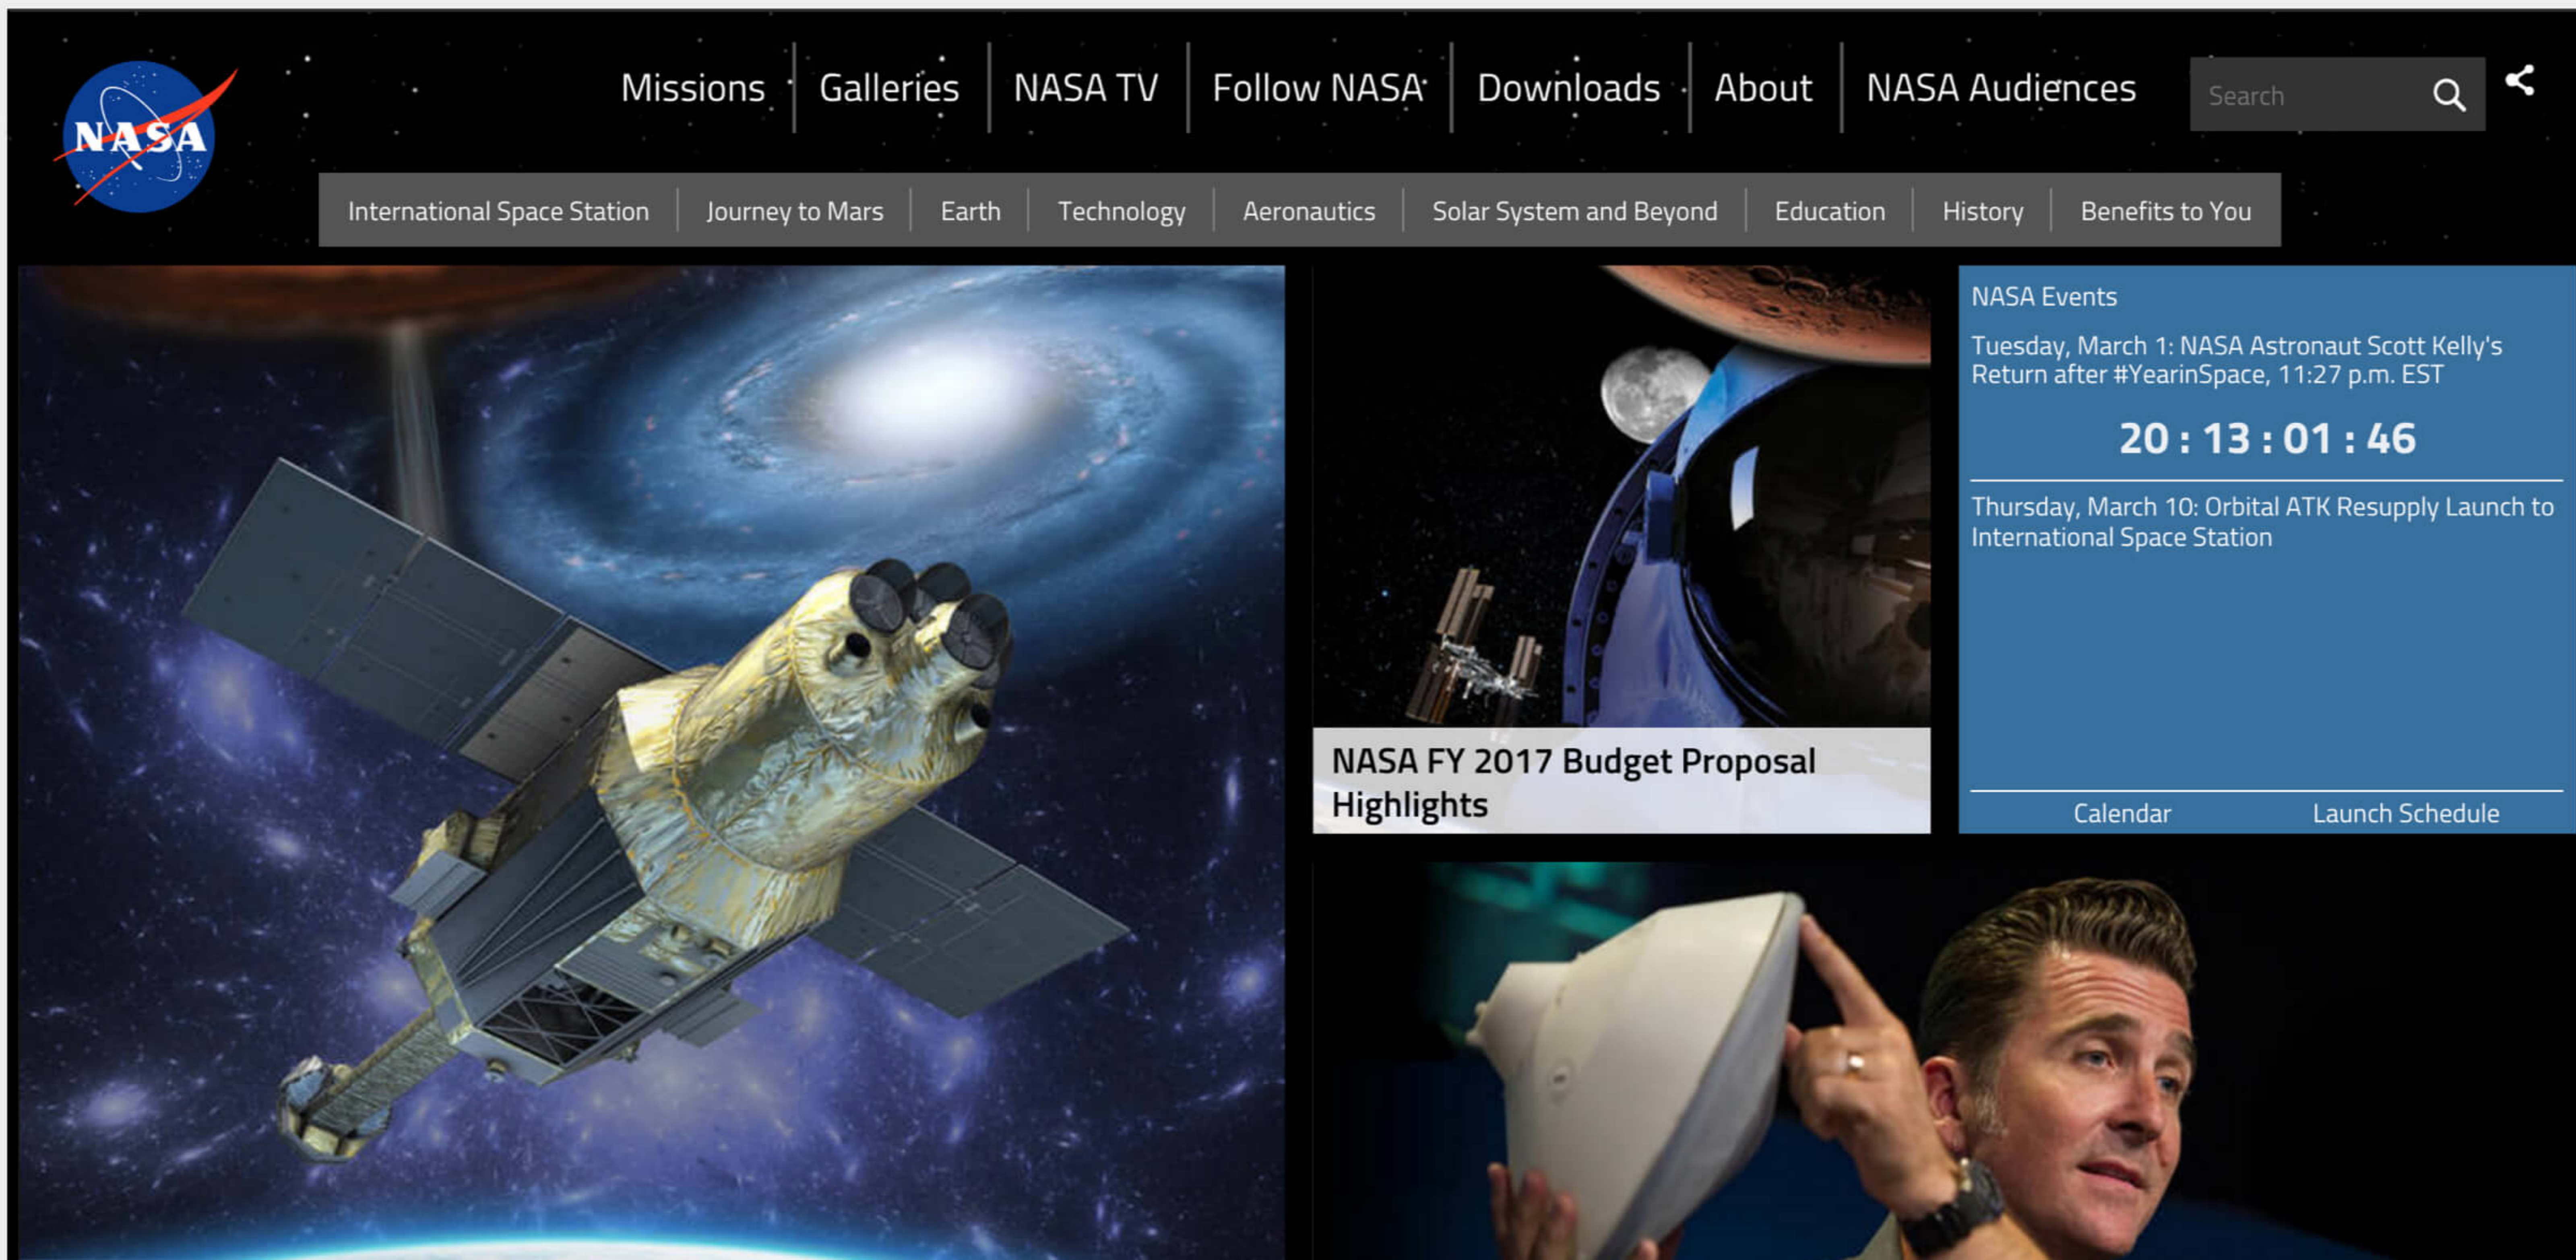

OUR EXPERIENCE

Mobomo is proud to work with some of the most forward-looking agencies in the federal government, including USGS, NASA, FDIC, VA, Navy, and others. **Read** about some of the successes they have had with us.

Mobomo launched NASA.gov, the Navy Apps (Android, iOS, Windows Phone, Chromebook), USA.gov responsive design website, Beta.export.gov, and search.usa.gov.

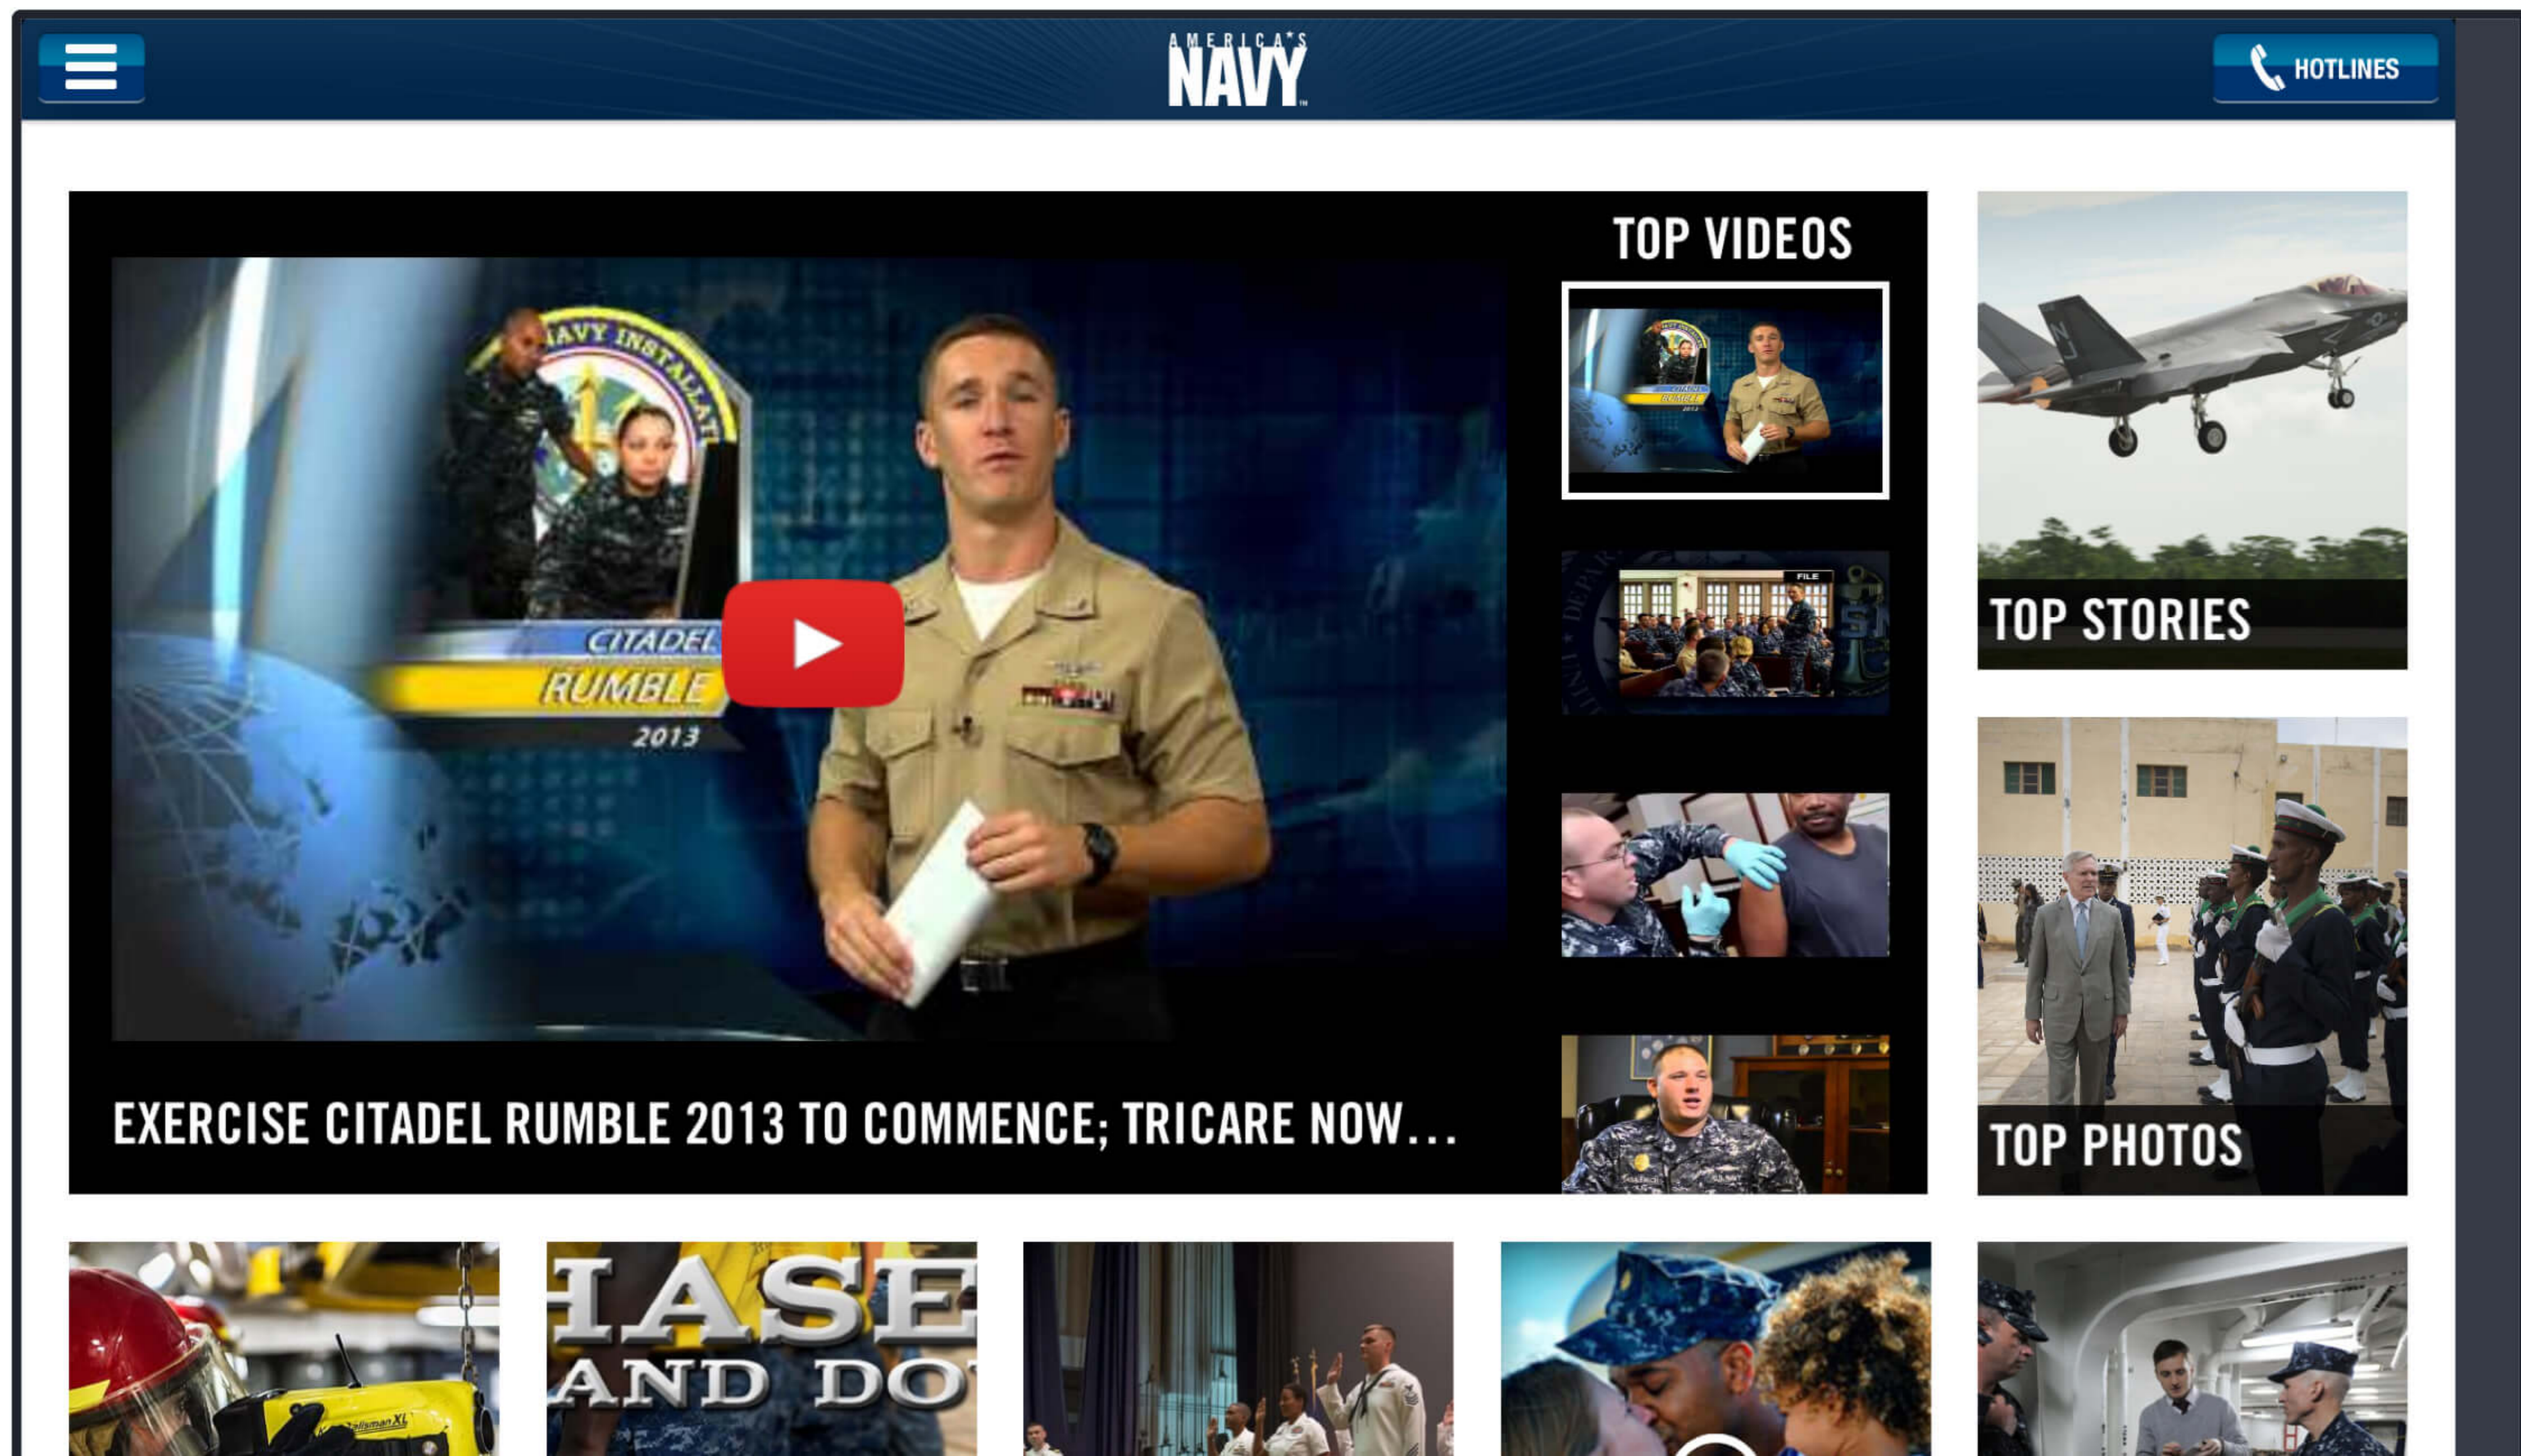

NASA

Our team has helped relaunch www.NASA.gov with a dynamic, user-centric, mobile-first design, simplifying the experience for every visitor.

NAVY

This multi-platform, outreach app allows users to access constantly updated Navy news, blogs, and videos.

FDIC

Mobomo worked with FDIC to develop a new secure, user-friendly Online Ordering System using a Drupal Commerce solution hosted on the Amazon Cloud.

OPEN SOURCE FOR GOVERNMENT

We are advocates of the open-source community, especially for government. Check out some of our open-source contributions we helped our government clients achieve:
